2nd April, 1965.

Dear Sirs,

By this letter we are pleased to confirm that

Messrs. Queens Radio & Television Corporation,
796 & 861, Alutmawatte Road,
Colombo 15

are the exclusive representatives of our company for the servicing of the ARKAS automatic pilot for ships manufactures at our factory in Copenhagen.

Well over 2.000 of our equipments are in operation on board ships of every nationality, and detailed knowledge of our equipment is essential for proper and efficient service work. In order to obtain this specialized knowledge we consider it essential that the service engineer, who is handling our equipment, should follow a special training course at our factory where he may benefit from our own knowledge and the facilities of our own workshops where he may study the manufacturing process at every stage.

Yours faithfully,

DANSK AUTOMATISK ROR-KONTROL A/S

LARS MIDDELBOE
